

HERO Lock Types

- **Camlocks are supplied as standard on all HERO Lockers**
- **Hasp and staple locks are available at no additional cost**
- **All locks are available as retro fit options for HERO Lockers**

Camlock

Powerful 1 billion combination lock is supplied as standard to avoid duplication of keys and minimise theft. Two keys are included with each lock. Exclusive to HERO! (Master key sold separately).

Hasp and staple

Simple design allows lockers to be latched shut with the additional option of a padlock for extra security. Shank diameter maximum 7mm and minimum 5mm. Padlock not supplied.

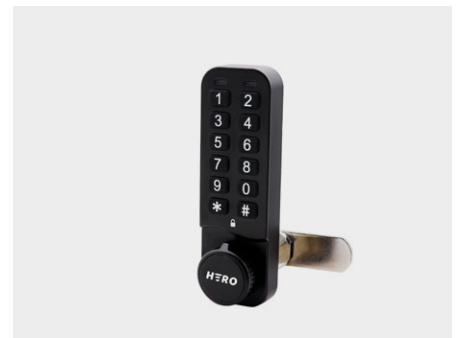

Coin Return Lock

Surface mounted with user friendly operation. Accepts £1 coins thus encouraging users to return their key. (Override key sold separately).

Manual combination lock

All metal lock with 4 digit code combination. Available in private and public mode with auto scramble dials. Re-programmable and easy to operate. (Override key sold separately).

Digital combination lock

Simple to programme and available to set in private and public modes depending on application. 40,000 combinations and battery cycles. Available in vertical and horizontal orientation. (Override key sold separately).
